PROFESSIONAL EXPERIENCE

Applications Analyst II (Senior Systems Analyst)

Jun 2023 – Jun 2026

Massachusetts General Hospital (MGB) | Boston, MA

Clinical Application Ownership & Configuration

- Owned and managed 10+ clinical applications and hardware inventory for procedural documentation, image capture, and connectivity across gastroenterology, functioning as the primary resource bridging IT infrastructure and bedside clinical workflows for ~200 endpoints across 5 clinical sites.
- Configured, maintained, and optimized specialty applications (Provation MD, EndoFlip, FibroScan, EvoEndo, ManoScan, PillCam Rapid, Bravo pH, Centrak EM and RTLS), acquiring deep knowledge of clinical workflows and software functionality to support end-user operations.
- Acted as primary liaison between clinical end-user departments and software vendors (Provation, Olympus, Capsule, Centrak), managing timelines, escalating issues, and ensuring agreed-upon deliverables were met.
- Led project teams across 15+ concurrent initiatives from initiation through go-live, defining scope, coordinating meetings, resolving workflow and system issues, and communicating status to all stakeholders.

Medical Device & Hardware Integration

- Managed end-to-end integration of clinical imaging and diagnostic hardware with documentation systems, including video routing, image capture connectivity, and VNA integration (EvoEndo – Provation, GI Genius/Virgo – Olympus – Provation, PVR Machine – DICOM Connectivity, Vectra System).
- Upgraded the FibroScan system to a newer version, managing digital approvals and network connectivity improvements; coordinated FibroScan – Epic Gateway provisioning, enabling automated data capture from diagnostic hardware directly into the EHR and eliminating manual clinical entry.
- Provisioned Capsule neurons with EAPTLS WiFi certification for wireless clinical device connectivity and synchronized AP maps with Cisco DNA maps for Centrak infrastructure connectivity for RTLS and EM assets.
- Expanded endoscopy room hardware infrastructure with full BMDI validation, ensuring clinical device data integrity across newly built procedural environments.

System Implementation, Upgrades & Testing

- Designed and executed testing plans (UAT, application, and integrated testing) for system enhancements and new deployments, documenting bugs, tracking resolution, and communicating status to end users and vendors.
- Led Provation version upgrades (v490 – v520 – v540 – v560) and Oracle DB patching, managing rollback procedures, coordinating vendor training, and executing go-live with minimal clinical disruption.
- Managed new site deployment of Provation, coordinating hardware/software installation with vendors, Technical Support, and end-user departments including post-live support.
- Led migration of local Motility application installs (Bravo, Rapid Reader, Manometric) to Citrix and Enterprise MDM (Intune), managing ServiceNow CIs and KBs, and coordinating off-hours cutover to minimize clinical impact.

Reporting, Training & Ongoing Support

- Served as primary Tier-2 escalation point for 10+ clinical applications, triaging and resolving complex issues while maintaining SLA compliance and communicating priority to vendors and IT leadership; managed onboarding and provisioning for 50+ new clinicians and staff annually.
- Acted as a primary resource for Endoscopic Procedural Reporting in Provation and Reporting Workbench in Epic for clinical, operational, and regulatory requests.
- Developed and distributed MUSE turnover time reports for 5+ clinical sites, supporting operational decision-making at quarterly leadership meetings.
- Built a Provation training program integrated with HealthStream LMS and ServiceNow, serving as primary trainer and maintaining all end-user documentation and Help Desk reference materials.
- Authored downtime and disaster recovery procedures (Active Directory, ISILON, Robocopy, DB backups) for support analysts to execute independently.

Research Assistant

Jan 2023 – May 2024

Michigan Medicine, University of Michigan | Remote – Ann Arbor, MI

- Managed multi-study research data pipelines in REDCap and EndNote, creating custom reports based on research protocols and discussions using Python and R.
- Co-led drafting research manuscripts with a faculty investigator, synthesizing findings and preparing materials for peer-reviewed submissions.

Clinical Applications & Epic OpTime Intern

Jun 2022 – Aug 2022

Stanford Health Care | Stanford, CA

- Cleaned and documented 36 clinical applications, including 5 in Neurology and Respiratory, improving workflow efficiency by 20% across departments.
- Assisted with testing in Epic TST environment using 4+ clinical use cases, validating functionality across clinical workstations.
- Contributed to the implementation of a clinical application enhancement through server/database management, improving system performance and reliability by 15%.

Teaching Assistant — Health Informatics (HMP 600, HMP 669 | NURS 539)

Aug 2022 – Apr 2023

University of Michigan | Ann Arbor, MI

- Graduate Student Instructor supporting 250 students; clarified conceptual queries on payer-payee-provider systems, population health, CHNA, SDOH, Project Charter, Quality analysis, Balanced Scorecards, Process Improvement, cause & effect mapping, and health database management using SQL and R.

EDUCATION

Master of Health Informatics | Graduate Certificate in Precision Medicine

2021 – 2023

University of Michigan, Ann Arbor | GPA: 3.95 / 4.0

Bachelor of Dental Surgery

2014 – 2019

Government Dental College and Hospital, Hyderabad, India | GPA: 3.86 / 4.0

TECHNICAL SKILLS

EHR & Clinical Systems: Epic (OpTime, FHIR, Reporting Workbench, Order Entry, Pop-up Alerts), HL7 v2.x, CDA R2, FHIR querying, ServiceNow, Ensemble Middleware, Interface Monitoring, HIPAA de-identification

Databases & Infrastructure: Oracle DB, SQL (Access, SQLite, SSMS, Python), Relational DB design & normalization, IIS Server, Citrix, Active Directory, ISILON, Robocopy

Reporting & Analytics: Tableau, Power BI, Python (pandas, NumPy, scikit-learn), R, Machine Learning, NLP, SPSS

Project & Change Management: ITIL, Project Charter, Gantt Charts, Balanced Scorecards, Process Re-engineering, Stakeholder Communication, Vendor Management

Productivity & Tools: MS Office Suite (Word, Excel, PowerPoint, Access, SharePoint), GSuite, Asana, Miro, REDCap, Qualtrics, Git/GitHub
